☐ About

X-Propeller simplifies your **information governance strategy** with flexible retention schedules, preservation for defensible discovery, and disposition management. Easily identify records that have not been properly classified or managed and make sure important work is maintained and protected over time.

X-Propeller's Uniform Filing System is a flexible, customizable information governance solution that reduces risk by shrinking the content lifecycle management gap between business and legal, IT and security. It creates an efficient, verifiable process for managing digital assets over time to meet changing compliance regulations.

At the heart of the Content Cloud sits the X-Propeller. With its FIPS 140-2 certified and AES 256-bit encryption, you can easily protect your data from unauthorized access. And with three user-friendly sharing roles, giving you complete control over who can see what.

You need more than a document storage system.

You need protection, governance, and compliance. **You need X-Propeller.**

Elevate Information Governance Strategy & Data Integrity Of Your Contracting Process

Data integrity refers to the reliability and trustworthiness of your contracting data throughout its lifecycle. It can describe the state of your data—e.g., valid or invalid—or the process of ensuring and preserving the validity and accuracy of data.

How XPropeller Classifies Data Integrity and Data Security?

Data integrity is not to be confused with data security. Data security refers to the protection of data, while data integrity refers to the trustworthiness of data.

Data security focuses on how to minimize the risk of leaking intellectual property, business documents, healthcare data, emails, trade secrets, and more. XPropeller maneuvers specific roles management, data classification, identity, and access management, threat detection, and security analytics.

Why is it Important to Maintain Data Integrity In Credentialing & Contracting?

Imagine making an extremely important business decision hinging on data that is entirely, or even partially, inaccurate. Healthcare Administrators Owners routinely make data-driven business decisions, and those decisions without integrity can dramatically affect the company's bottom-line goals.

Data Integrity Threats In Credentialing & Contracting

Data integrity can be compromised through human error or, worse yet, through malicious acts. For example, data that are accidentally altered during the transfer from one device to another or even when reviewing a contract up can be compromised/ misplaced or even destroyed by hackers.

Common threats that can alter the state of data integrity include

- ☐ Human error
- ☐ Unintended transfer errors
- ☐ Misconfigurations and security errors
- ☐ Malware, insider threats, cyberattacks
- ☐ Compromised hardware

Retrievability and accessibility With X-pro – It's important to have accurate data in the proper locations at the right time when anyone is working on credentialing, contracting or projections. Without proper and easy access and retrieval, it can be detrimental to your facility, yielding the way to your win.

Traceability – With X-pro, you can trace every touchpoint you make with insurance or your compliance systems.

How? With accurate data points. The data can inform decision-makers, and highlight red flags, deficiencies, or limitations. With X-pro be assured that these touchpoints are accurate even when you are not watching.

Reliability –

With X-pro it's no longer an issue. It is the valiant X-pros responsibility to do is to preserve data integrity of your practice. That way, management can confidently make data-driven decisions that steer their medical facility in the right direction.

Empowering Decision Makers

Not too long ago, it was difficult to collect data. However, with Xpropeller it's no longer an issue. Do not worry about mounting data, Xpro is built to preserve data integrity with macro data which is fundamental in the success of a medical practice .

That way, Practice owners can confidently make data-driven decisions that steer their facility in the right direction.

Where Do We Get Our Data - Using Data, You Can Trust

We collect, clean, and verify billions of data points daily using machine learning algorithms, web crawlers, and human analysts.

We ensure our data is verified daily - so you can close deals confidently.

Track Success

Search company and investor profiles for deep insights into their growth and performance over time. Break the cycle of doing business without good data.

COMPLETENESS & CONVENIENCE

Fill in the blanks on your customers, clients, and leads. Make decisions with complete data.

Join Wait List

Supercharge your workflow with built-in integration, from the first day forward.

Complex Contract Management Reinvented

Feature 1 - With X-Propeller manage documents in a more structured and efficient manner when handling large classifications of documents.

1. Compound document management - finer-grain access control and versioning

Allows users to configure rules for breaking up source documents and auto-assigning sequenced subdocuments

Users have granular control over how a compound document is broken up, not just the Data Center Administrator and Practice Administrator, Practice Coordinator to configure rules for breaking up source documents and auto-assigning sequenced subdocuments

Feature 2 Compound document management

Compound document management allows you to group related elements together. In compound documents, folders also affect navigation when you display and group documents that contain multiple independent elements.

Folder Templates reduce administrative time spent on creating custom folder structures, allow for consistency and best practice configuration across all repositories, and organize documents within a structure that can be easily navigated by XPropeller's bundled document browser.

The intended benefits of this feature include the ability to efficiently create consistent file structures throughout the enterprise repository that encapsulate security and document management functionality, as well as multiple folders. This will allow users to manage documents effectively.

Feature 3: With Xpropeller's Uniform filing system retrieve your documents in seconds

Auto-assigned DCN reduces the risk of mix-up or error due to duplication.

Users can easily and quickly search, retrieve and update documents.

Be notified of new documents being created/moved or if the order of the documents is changed or deleted.

Change notifications are made easy with Xpropeller.

Users can receive emails anytime their document order changes. They can also automatically send alerts to other designated users that the initial user wants to let them know major changes have occurred, such as a file being added or deleted.

XPropeller offers this excellent feature, as basic features of a document management system – create folders and organize your different types of documents. These features are perfect for Healthcare facilities who need a powerful tool to get some organization done.

Feature 4: OCR & Freetext search

The OCR feature in XPropeller identifies text in images and extracts machine-readable text from all pictures and PDFs uploaded to the system.

With OCR efficiently converts information from unstructured to structured data and save time by extracting plain text from hundreds or thousands of documents, and automatically structuring your data into digital records.

X Propellor is a fast and versatile search engine for e-mails and other text documents.

Search Without Limits

X Propellor offers multiple search possibilities that allow you to find the exact information needed in seconds.

Freetext searching, Indexing of the contents of emails, Indexing based on the synonym structure of the emails, Explanatory X-Tags for the connection to relevant documents, Indexing of freeform texts, Verification of duplicate items, Indexing based on word stemming methods.

The EDMS - BPMS Connect

Xpropeller can check your documents in the EDMS for validity and ensure you have the most up-to-date versions.

If the document is found to be outdated or otherwise invalid at any point in the EDMS, it will be flagged by this process and then sent through a series of validation checks before being approved for use in the BPMS.

Ensuring that documents are not used until they have been successfully validated, thus minimizing risks and making it possible to reap full benefits from proactive compliance management.

Apply To Payers In Bulk in one click

Easily schedule and auto-send your applications electronically to providers or in bulk

Xpropeller reminds you to the inbox that their application is still open.

Decrease provider drop outs while streamlining workflow through this unique tool.

Xpropeller Vs Box vs Google Drive

Testimonials

1. While many document management solutions are on the market, none are purpose-built for healthcare providers.
2. The way EDMS & BPMS automation are integrated is a stellar collaboration solution. The automation engine is highly configurable. It allows our team to easily deliver complex integration requirements saving a ton of time and resources.
3. XPropeller has revolutionized how we manage our contracting; The system is so intuitive that it feels like we always have 10 people working for us in the background
4. XPropeller's technology is innovative and very well executed. The collaboration capabilities are a huge time saver.

Now, you can set a plan, hit the Submit button and get on with what you do best. We take care of the rest.

It's a big deal. It's how we bring our best people together to share their passion with you. It's how we help our clients grow their businesses every single day.
